## Product Description

### Micro Electric Sanitation Vehicle SKBJ3000-G Technical Specifications

The sanitation cabinet features blue/white 100% PP injection-molded construction with impact, chemical, and corrosion resistance. Its sealed structure incorporates dual-layer lids to prevent leakage during operation. The  $\leq 80^\circ$  rotatable design enables single-motion waste dumping, with rear bumpers protecting against tipping damage.

The frame employs polyester powder coating with multi-stage anti-corrosion treatment, delivering rustproofing, salt spray resistance, and scratch protection. Quad-braking systems include synchronized rear-wheel parking locks for safety, supplemented by a front storage basket.

LED lighting provides low-heat operation, extended lifespan, and energy efficiency compared to traditional bulbs. The rear axle utilizes dual-drive differential transmission with all-steel gearing for high-torque performance, energy savings, and low noise.

Powered by maintenance-free batteries featuring auto-cutoff charging and short-circuit protection. Honda-inspired front design integrates stainless steel handles, LCD instrumentation, and hydraulic shock absorbers with reflectors. Microcontroller systems optimize energy efficiency through automatic protection protocols.
