## 10 Cubic Meters Capacity Collection Truck for Sorting Garbage 80km Cruising Range in Market

Our Product Introduction

more products please visit us on [electriccleaningvehicle.com](http://electriccleaningvehicle.com)

### Basic Information

### Product Specification

- Max Speed: 60 Km/h
- Power Source: Diesel
- Overall Dimensions: 4450\*1520\*1970mm
- Type: Collection Truck
- Compaction Ratio: 1:3
- Collection Method: Automatic
- Cruising Range: 80km
- Motor Power: 72V 7.5kw
- Highlight: 10 cubic meters garbage collection truck, garbage sorting truck with 80km range, large capacity waste collection vehicle

## Product Description

### Product Description:

The Garbage Sorting Collection Truck is an essential tool for efficient waste management, designed to meet the demands of refuse segregation and recycling. With a rated passenger capacity of 2, this collection truck ensures that the sorting process can be carried out effectively by a small team.

One of the key features of this recycling truck for garbage sorting is its impressive compaction ratio of 1:3. This means that the truck can compact a large volume of waste into a much smaller space, maximizing the efficiency of garbage collection and disposal.

Measuring at overall dimensions of 4450\*1520\*1970mm, the Garbage Sorting Collection Truck is compact enough to navigate through urban areas and narrow streets, making it ideal for waste collection in various environments.

Despite its compact size, this refuse segregation collection truck boasts a maximum load capacity of 1200kg, allowing it to handle significant amounts of waste in a single trip. This high load capacity contributes to the truck's efficiency and productivity in waste management tasks.

With a cruising range of 80km, the Garbage Sorting Collection Truck offers ample coverage for waste collection operations, ensuring that it can reach multiple locations without the need for frequent recharging or refueling.

Overall, the Garbage Sorting Collection Truck is a reliable and practical solution for waste management professionals, providing the necessary tools and capabilities to streamline the process of garbage sorting and recycling. Its compact design, high load capacity, and efficient compaction ratio make it a valuable asset for municipalities, waste management companies, and recycling facilities.

### Features:

Product Name: Garbage Sorting Collection Truck

Compaction Ratio: 1:3

Rated Passenger Capacity: 2

Capacity: 10 Cubic Meters

Type: Collection Truck

Motor Power: 72V 7.5kw

### Technical Parameters:

|                          |                           |
|--------------------------|---------------------------|
| Overall Dimensions       | 4450*1520*1970mm          |
| Maximum Load             | 1200kg                    |
| Compaction Ratio         | 1:3                       |
| Cruising Range           | 80km                      |
| Motor Power              | 72V 7.5kw                 |
| Rated Passenger Capacity | 2                         |
| Type                     | Collection Truck          |
| Car Volume               | 6-8 Barrels (240L/barrel) |
| Power Source             | Diesel                    |
| Max Speed                | 60 Km/h                   |

### Applications:

Garbage sorting collection vehicle, also known as a refuse segregation collection truck, is an essential tool in waste management systems. With its mechanical sorting method, this collection truck is designed to efficiently separate different types of waste for proper disposal and recycling. The incorporation of a GPS tracking system ensures effective monitoring of the truck's route and activities.

The product application occasions for the garbage sorting collection truck are diverse and crucial for maintaining clean and sustainable environments. Municipalities can utilize these trucks for regular waste collection in urban areas, ensuring the proper segregation of recyclable materials from general waste. Additionally, industrial facilities and commercial establishments can benefit from the efficient waste management provided by these trucks.

One of the key scenarios for using the garbage sorting collection vehicle is during large-scale events and festivals where waste generation is high. The truck's maximum load capacity of 1200kg allows for the collection of substantial amounts of waste, contributing to the cleanliness and organization of the event venue.

The overall dimensions of the refuse segregation collection truck, measuring 4450\*1520\*1970mm, make it suitable for navigating through urban streets and accessing narrow alleys where waste collection is required. Its mechanical sorting method streamlines the process of separating recyclable materials such as paper, plastic, and glass from organic waste and non-recyclables.

In conclusion, the garbage sorting collection vehicle is a versatile and efficient solution for waste management in various settings. Its GPS tracking system, mechanical sorting method, and ample load capacity make it an indispensable tool for promoting sustainability and cleanliness in communities, events, and industrial facilities.

### Customization:

Customize your Waste sorting pickup truck with our Product Customization Services: .....

Capacity: 10 Cubic Meters

Sorting Method: Mechanical

Motor Power: 72V 7.5kw

Power Source: Diesel

Maximum Load: 1200kg

### Support and Services:

The Garbage Sorting Collection Truck product comes with comprehensive Product Technical Support and Services to ensure optimal functionality and customer satisfaction. Our dedicated team of technical experts is available to provide assistance with any inquiries or issues regarding the product.

Our support services include troubleshooting guidance, maintenance recommendations, and compatibility checks to address any concerns that may arise during the use of the Garbage Sorting Collection Truck. Additionally, we offer training programs and resources to help users maximize the potential of the product and enhance operational efficiency.

### Packing and Shipping:

**Product Packaging:**

This Garbage Sorting Collection Truck is carefully packaged to ensure safe delivery. It is wrapped in protective materials to prevent any damage during transit.

**Shipping:**

We offer free shipping for all orders of the Garbage Sorting Collection Truck within the United States. International shipping is also available with additional charges based on the destination.

### FAQ:

**Q: What is the capacity of the Garbage Sorting Collection Truck?** .....

**A:** The Garbage Sorting Collection Truck has a capacity of 10 cubic meters.

**Q: How many compartments does the Garbage Sorting Collection Truck have?**

**A:** The truck is equipped with 3 compartments for sorting different types of waste.

**Q: What is the power source of the Garbage Sorting Collection Truck?**

**A:** The truck is powered by a diesel engine for efficient operation.

**Q: Does the Garbage Sorting Collection Truck have a compact design for easy maneuverability?**

**A:** Yes, the truck is designed with a compact body for easy navigation in urban areas.

**Q: Can the Garbage Sorting Collection Truck be customized to include additional features?**

**A:** Yes, the truck can be customized with optional features such as a weighing system or GPS tracking.
