Basic Information

Product Specification

- Features: GPS Tracking System
- Capacity: 10 Cubic Meters
- Max Speed: 60 Km/h
- Compaction Ratio: 1:3
- Power Source: Diesel
- Cruising Range: 80km
- Motor Power: 72V 7.5kw
- Rated Passenger Capacity: 2
- Highlight: 60 km/h garbage collection truck,
1200kg load garbage sorting truck,
GPS tracking garbage collection truck

Product Description

Product Description:

The Waste Sorting Pickup Truck is a state-of-the-art recycling truck designed for efficient garbage sorting. With automatic collection method and a generous capacity of 10 cubic meters, this refuse segregation collection truck is ideal for municipalities and waste management companies looking to streamline their operations.

Equipped with a cutting-edge GPS tracking system, this recycling truck for garbage sorting offers real-time monitoring and tracking capabilities, ensuring optimal route planning and fleet management.

One of the standout features of this garbage sorting collection truck is its mechanical sorting method, which efficiently separates different types of waste materials during collection. This not only enhances the recycling process but also reduces the amount of waste ending up in landfills.

The Waste Sorting Pickup Truck boasts a car volume capacity of 6-8 barrels, with each barrel holding 240 liters of waste. This ample storage space allows for extended collection runs without the need for frequent unloading, increasing overall efficiency.

Features:

Product Name: Garbage Sorting Collection Truck

Motor Power: 72V 7.5kw

Features: GPS Tracking System

Capacity: 10 Cubic Meters

Overall Dimensions: 4450*1520*1970mm

Compaction Ratio: 1:3

Technical Parameters:

Power Source	Diesel
Compaction Ratio	1:3
Motor Power	72V 7.5kw
Overall Dimensions	4450*1520*1970mm
Capacity	10 Cubic Meters
Type	Collection Truck
Rated Passenger Capacity	2
Features	GPS Tracking System
Collection Method	Automatic
Sorting Method	Mechanical

Applications:

A Garbage Sorting Collection Truck, also known as a Refuse Segregation Collection Truck, is a versatile vehicle designed for efficient waste management in various settings. With a compaction ratio of 1:3, this truck is ideal for compacting different types of waste to maximize capacity during collection and transport.

The truck's sorting method is mechanical, ensuring that the waste is effectively separated and organized for proper disposal or recycling. This feature is crucial for enhancing the recycling process and minimizing environmental impact.

Powered by a 72V 7.5kw motor, the Garbage Sorting Collection Truck offers reliable performance and energy efficiency. The motor power enables the truck to handle heavy loads of up to 1200kg, making it suitable for collecting waste from residential areas, commercial establishments, and public spaces.

With a rated passenger capacity of 2, this truck can accommodate a driver and an additional passenger, facilitating safe and convenient operation. The compact design of the vehicle allows for easy maneuverability in urban environments, enhancing accessibility to different collection points.

The Garbage Sorting Collection Truck is well-suited for various application occasions and scenarios, including municipal waste management, industrial waste collection, and recycling operations. Its efficient compaction, mechanical sorting method, and powerful motor make it an essential tool for sustainable waste disposal practices.

Customization:

Customize your Recycling truck for garbage sorting with our Product Customization Services:

- Car Volume: 6-8 Barrels (240L/barrel)
- Max Speed: 60 Km/h
- Compaction Ratio: 1:3
- Rated Passenger Capacity: 2
- Power Source: Diesel

Support and Services:

The Garbage Sorting Collection Truck product comes with comprehensive product technical support and services to ensure optimal performance and customer satisfaction. Our team of experts is dedicated to providing assistance with product installation, maintenance, troubleshooting, and any technical inquiries that may arise.

Our services also include regular maintenance programs, training sessions for operators, and access to genuine replacement parts to keep your Garbage Sorting Collection Truck functioning at its best. Additionally, we offer customization options to tailor the product to specific requirements and enhance its efficiency in waste management operations.

Packing and Shipping:

Product Packaging:

The Garbage Sorting Collection Truck is carefully packaged in a sturdy cardboard box to ensure safe delivery. The truck is wrapped in protective materials to prevent any damage during transportation.

Shipping:

We offer fast and reliable shipping services for the Garbage Sorting Collection Truck. Orders are typically processed and shipped within 1-2 business days. Customers will receive a tracking number to monitor the status of their delivery.

FAQ:

Q: What is the capacity of the Garbage Sorting Collection Truck?

A: The Garbage Sorting Collection Truck has a capacity of 10 cubic meters.

Q: Does the Garbage Sorting Collection Truck have separate compartments for different types of waste?

A: Yes, the truck is equipped with separate compartments for sorting different types of waste, such as recyclables, organic waste, and general waste.

Q: What is the power source of the Garbage Sorting Collection Truck?

A: The truck is powered by a diesel engine, providing efficient and reliable operation.

Q: Are there safety features included in the Garbage Sorting Collection Truck?

A: Yes, the truck is equipped with safety features such as backup cameras, emergency stop buttons, and warning alarms to ensure the safety of operators and pedestrians.

Q: Is the Garbage Sorting Collection Truck suitable for urban areas with narrow streets?

A: Yes, the truck is designed to maneuver easily in urban areas with narrow streets, making it suitable for efficient waste collection in city settings.
