Basic Information

Product Specification

- Sorting Method: Mechanical
- Compaction Ratio: 1:3
- Maximum Load: 1200kg
- Motor Power: 72V 7.5kw
- Rated Passenger Capacity: 2
- Overall Dimensions: 4450*1520*1970mm
- Power Source: Diesel
- Capacity: 10 Cubic Meters
- Highlight: 10 cubic meters diesel garbage truck, hazardous waste collection vehicle, non-hazardous waste sorting truck

Product Description

Product Description:

The Garbage Sorting Collection Truck is a powerful and efficient recycling truck designed specifically for garbage sorting and refuse segregation collection. Powered by a reliable Diesel engine, this truck is equipped to handle the demanding task of waste management with ease.

One of the standout features of this recycling truck is its impressive compaction ratio of 1:3. This means that it can compact a large volume of waste material into a much smaller size, allowing for more efficient storage and transportation of garbage.

With a maximum speed of 60 Km/h, the Garbage Sorting Collection Truck is not only powerful but also fast, enabling quick and timely waste collection and disposal services. Whether navigating through city streets or suburban areas, this truck can reach its destination swiftly and efficiently.

Equipped with a state-of-the-art GPS tracking system, this recycling truck offers real-time monitoring and tracking capabilities. This feature ensures that the truck's location and route can be easily monitored, allowing for better fleet management and optimized collection routes. When it comes to capacity, the Garbage Sorting Collection Truck boasts a maximum load of 1200kg. This generous load capacity means that the truck can handle a significant amount of waste material in a single trip, reducing the need for frequent unloading and increasing overall efficiency.

Features:

Product Name: Garbage Sorting Collection Truck

Collection Method: Automatic

Cruising Range: 80km

Overall Dimensions: 4450*1520*1970mm

Capacity: 10 Cubic Meters

Maximum Load: 1200kg

Technical Parameters:

Capacity	10 Cubic Meters
Maximum Load	1200kg
Type	Collection Truck
Features	GPS Tracking System
Motor Power	72V 7.5kw
Car Volume	6-8 Barrels (240L/barrel)
Power Source	Diesel
Cruising Range	80km
Compaction Ratio	1:3
Overall Dimensions	4450*1520*1970mm

Applications:

A garbage sorting collection truck is a specialized vehicle designed for efficient waste management and recycling. With a large car volume of 6-8 barrels, each barrel capable of holding 240 liters of garbage, this truck is perfect for collecting and sorting various types of waste materials.

One of the key features of this garbage sorting collection truck is the GPS tracking system, which enables precise monitoring of the vehicle's location and routes. This ensures optimized collection routes and timely pickups, enhancing overall operational efficiency.

The truck has a maximum load capacity of 1200kg, allowing it to transport a substantial amount of waste in each trip. This high load capacity makes it ideal for collecting waste from residential areas, commercial establishments, and industrial sites.

With a maximum speed of 60 km/h, the garbage sorting collection truck can quickly navigate through urban areas, reaching its destination in a timely manner. The rated passenger capacity of 2 ensures that the necessary personnel can accompany the vehicle during its collection rounds.

Product Application Occasions and Scenarios:

- Residential Areas: The garbage sorting collection truck is perfect for collecting household waste in residential neighborhoods, ensuring proper segregation and disposal of recyclable materials.
- Commercial Establishments: Businesses can utilize this truck to dispose of their waste in an environmentally friendly manner, promoting sustainable practices.
- Industrial Sites: The truck can be used in industrial facilities to collect and transport various types of waste generated during manufacturing processes.

In summary, the garbage sorting collection truck is a versatile and efficient vehicle that serves as a recycling truck for garbage sorting. Its high load capacity, GPS tracking system, and maximum speed make it an essential tool for waste management companies and municipalities looking to improve their waste collection processes.

Customization:

Product Customization Services for the Waste sorting pickup truck:

Refuse segregation collection truck:

Garbage sorting collection vehicle:

Cruising Range: 80km

Power Source: Diesel

Motor Power: 72V 7.5kw

Sorting Method: Mechanical

Features: GPS Tracking System

Support and Services:

The Product Technical Support and Services for the Garbage Sorting Collection Truck include:

- 24/7 hotline for any technical issues
- On-site maintenance and repair services
- Remote diagnostics and troubleshooting
- Regular software updates and patches
- Training and guidance for operators

Packing and Shipping:

Product Packaging for Garbage Sorting Collection Truck:

- The Garbage Sorting Collection Truck will be carefully packed in a sturdy cardboard box to ensure safe delivery.
- All components and accessories will be securely placed inside the box with adequate cushioning material to prevent any damage during transit.

Shipping Information:

- Shipping will be handled by our trusted delivery partners to ensure timely and safe arrival of the Garbage Sorting Collection Truck to your doorstep.
- A tracking number will be provided to track the status of your shipment once it has been dispatched.

FAQ:

Q: What is the capacity of the Garbage Sorting Collection Truck?

A: The Garbage Sorting Collection Truck has a capacity of 10 cubic meters.

Q: Is the Garbage Sorting Collection Truck equipped with sorting compartments?

A: Yes, the truck is designed with separate compartments for sorting different types of garbage.

Q: How is the Garbage Sorting Collection Truck powered?

A: The truck is powered by a diesel engine, providing reliable performance for waste collection operations.

Q: Does the Garbage Sorting Collection Truck have a hydraulic lifting system?

A: Yes, the truck is equipped with a hydraulic lifting system for efficient loading and unloading of garbage bins.

Q: What safety features are included in the Garbage Sorting Collection Truck?

A: The truck is equipped with safety features such as reverse cameras, warning lights, and emergency stop buttons to ensure safe operation during garbage collection activities.
